How It All Began

The Problem

TRUSTED SHOPS

A Familiar Situation

- New ideas emerge, everyone is excited.
- Business needs us to move quickly.
- But often projects get delayed.
- Limited resources/blocked capacity in design or development.
- Bound to work in a 2 week sprint structure.

The Actual Problem

- Good ideas reach users too late.
- Prototypes are either too rough or too complex.
- Constant compromise between speed and quality.
- Need for a better balance.
- Increasing growth targets calls for more efficient workflows.
- AI promises time reduction and autonomy.

Our Goals for Trusted Shops

Our Culture

- Be innovative.
- Learn from mistakes.
- Aim high and for measurable success.
- Share your insights.

Our Growth Approach

- Test quickly without losing quality.
- Adhere to the design system.
- Involve UX and Product early.
- One result leading to multiple validation paths.

TRUSTED SHOPS

Our Turning Point

The Solution

TRUSTED SHOPS

The Crucial Question

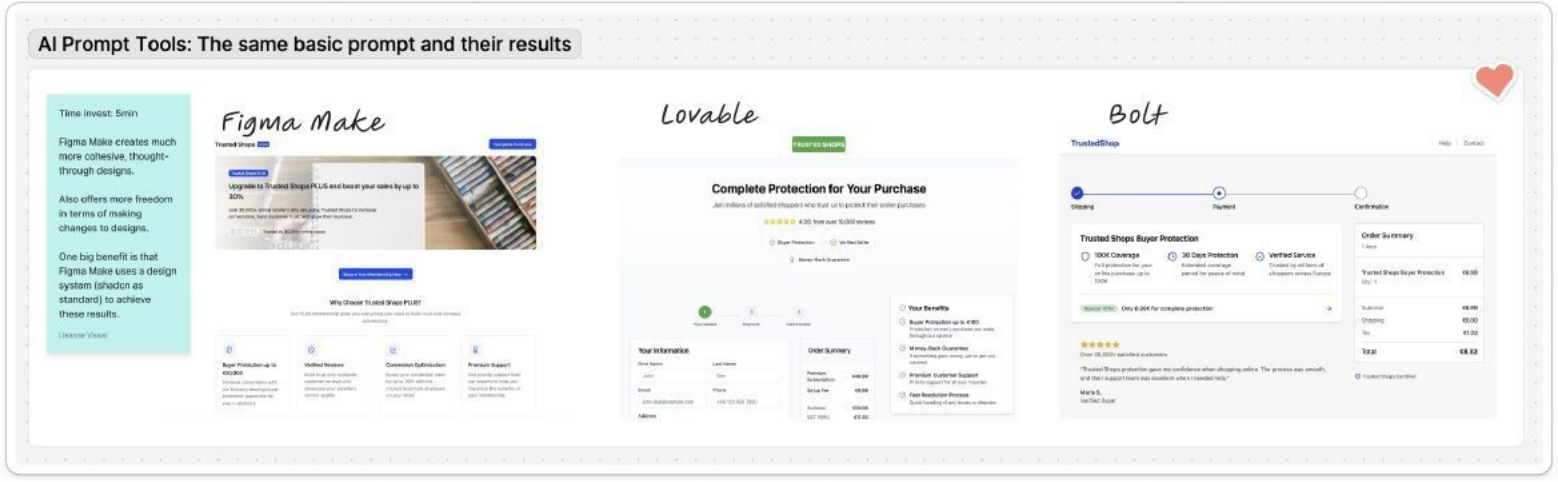

- What if prototyping was no longer a bottleneck?
- What if 2 days were enough?
- What if we aren’t limited in our ressources but limit ourself with old habits?

TRUSTED SHOPS

The Moment We Tested Figma Make

- What is Figma Make.
- Initial expectations (including skepticism).
- Why we decided to try it anyway.

Test prompts from 21.05.2025

TRUSTED SHOPS

Spoiler!

It worked...

- Key lever: Figma Design System file
- Huge time efficiency, massive reduction of dependencies
- Even bigger potential
- Unexpected: AI doesn’t divide us. Designers & Non-designers move closer together in collaboration.

Spoiler!

It worked...

- Key lever: Figma Design System file
- Huge time efficiency, massive reduction of dependencies
- Even bigger potential
- Unexpected: AI doesn't divide us. Designers & Non-designers move closer together in collaboration.

...but differently

- Not "AI does design."
- **Instead:** AI speeds up the path to discussion. Design quality remains human.
- Manual effort in correction (30+ prompts).
- Learning curve (initial prompt quality).
- Code generation (output + quality).

How We Did It

Our Journey

TRUSTED SHOPS

Our 2 Day Journey

Day 1

- Tool intro
- Idea & first prompt with implementation of design system
- Prompt & design iterations

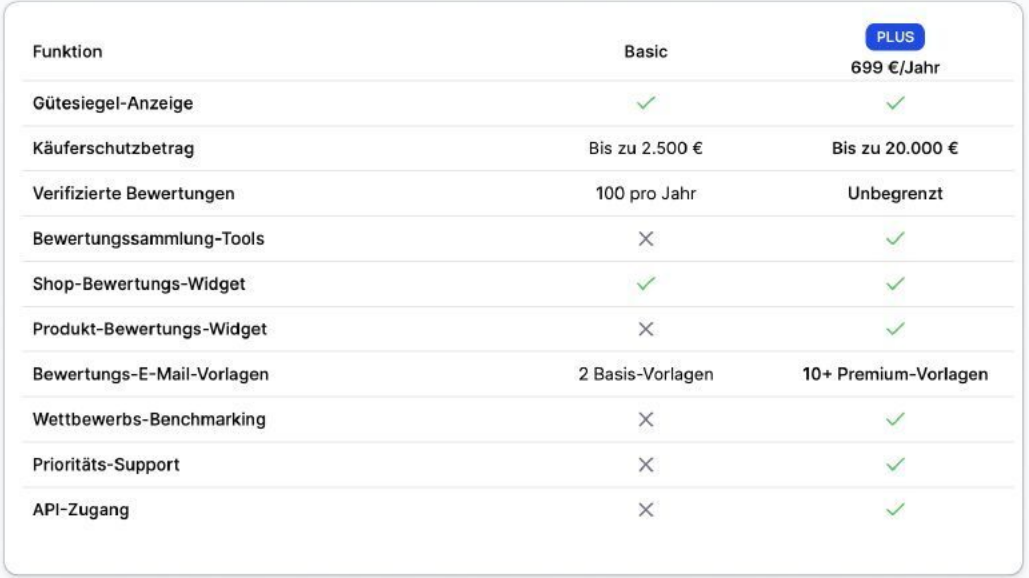

Day 2

- UX QA
- Export & experiment implementation
- Experiment QA (incl. UX/UI review)
- Launch of experiment

TRUSTED SHOPS

From Idea to Prompt

- Feature idea as hypothesis.
- H: Table supports product understanding, increases CR by 5%.
- Prompt as design briefing
- Initial prompt quality is important.
- Example: Table on PF. Tables are unthankful in design and HTML development.

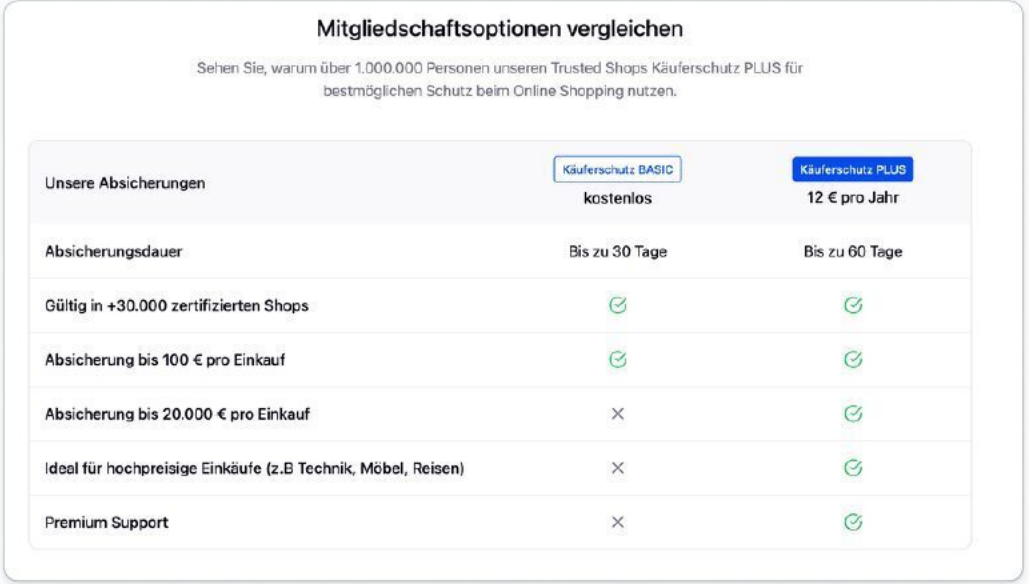

Funktion	Basic	PLUS 699 €/Jahr
Gütesiegel-Anzeige	✓	✓
Käuferschutzbetrag	Bis zu 2.500 €	Bis zu 20.000 €
Verifizierte Bewertungen	100 pro Jahr	Unbegrenzt
Bewertungssammlung-Tools	✗	✓
Shop-Bewertungs-Widget	✓	✓
Produkt-Bewertungs-Widget	✗	✓
Bewertungs-E-Mail-Vorlagen	2 Basis-Vorlagen	10+ Premium-Vorlagen
Wettbewerbs-Benchmarking	✗	✓
Prioritäts-Support	✗	✓
API-Zugang	✗	✓

First prompt result

TRUSTED SHOPS

From Prompt to Hi-Fi UI

- Initial outputs in Figma Make.
- Iterative refinement in Make and Kameleoon.
- Why "imperfect but concrete" is an advantage - UX as QA
- For AB Testing, Make design needs to be converted from react to HTML + CSS.

1st live test

TRUSTED SHOPS

Quick Iterations

- Iteration w/o Dependencies
- Table test was unsuccessful but promising
- 2nd iteration launched without UX or Dev involvement
- Why? 90% rule was met. If successful, UX makes final changes
- Freedom for AB tester to move quick, freedom for UX to apply best practices without testing

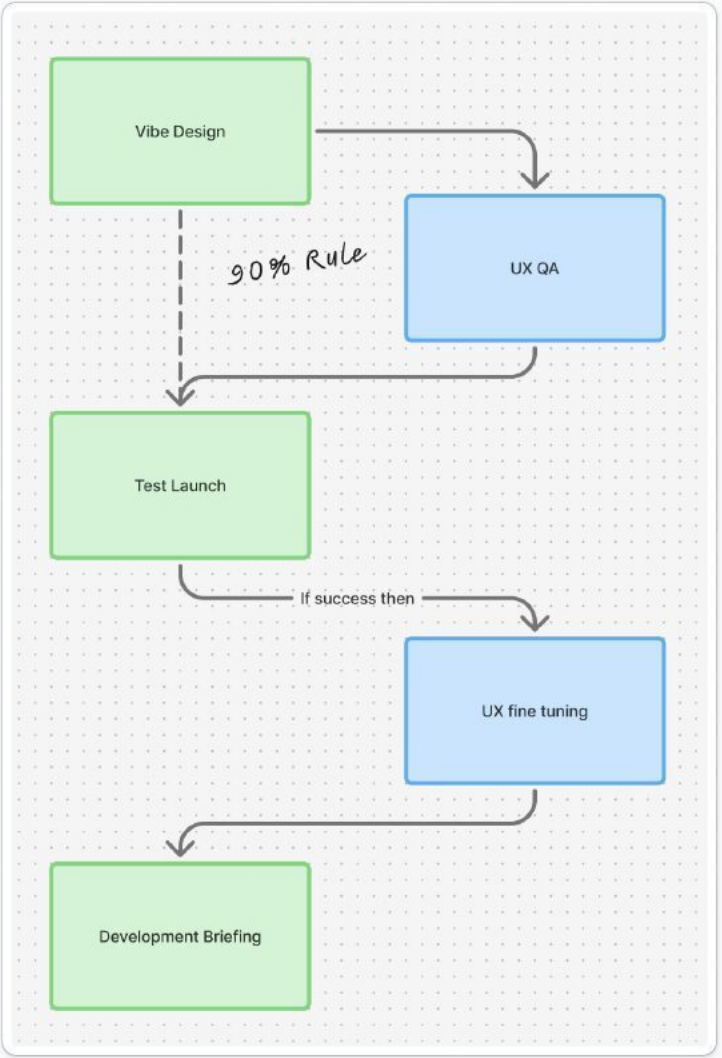

2nd live test

TRUSTED SHOPS

The Role of UX

- No vibe designing without UX
- Quick QA loops, veto right
- CM Team applies ≥ 90% rule for testing
- UX guarantees final implementation meets UX and company standards
- Goal: fail fast, iterate quickly

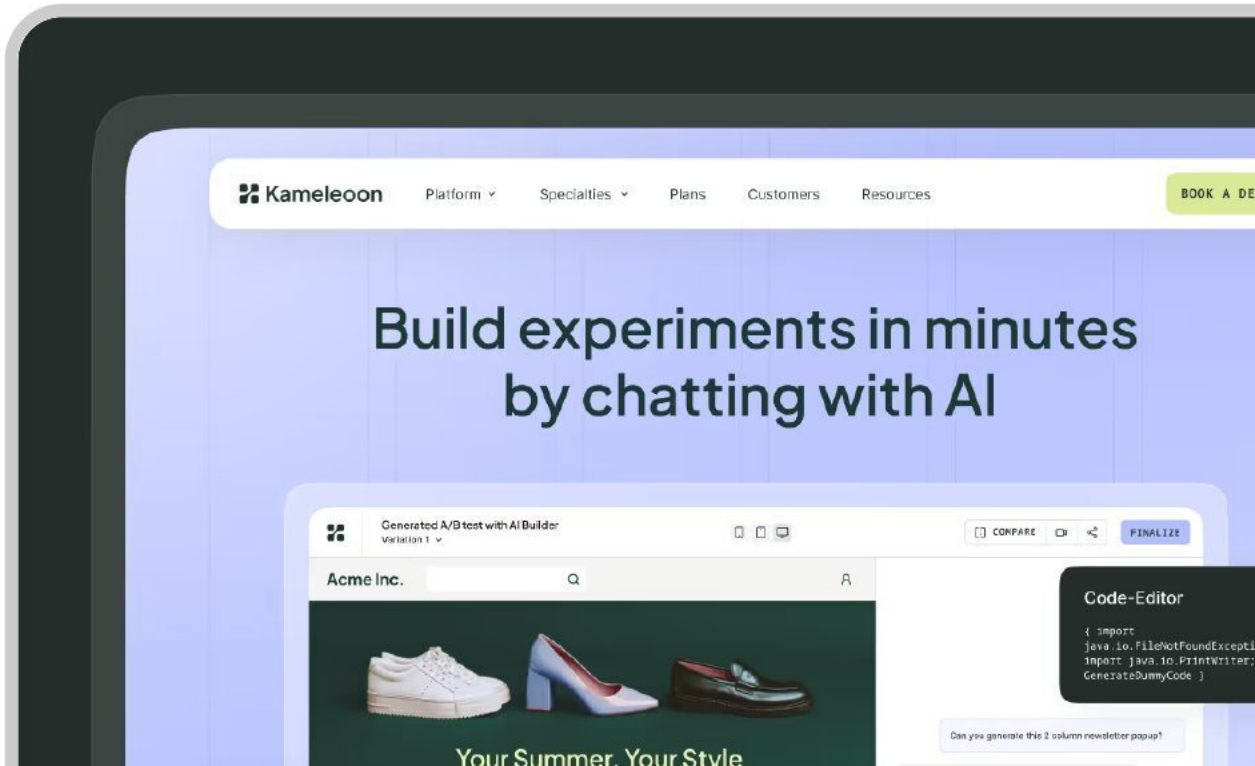

TRUSTED SHOPS

Live demo

Setup in Kameleoon

1. Create experiment
2. Select element
3. Insert HTML
4. Insert CSS
5. QA
6. Launch

TRUSTED SHOPS

And this was the story of how we changed a workflow of up to 2 weeks into 2 days.

Thank you for your attention.
